

## BUTTERFLY

Remember that butterflies need both nectar and host plants (for their caterpillars to eat), so be prepared for some leaf damage to host plants.

## SPECIAL HINTS FOR ATTRACTING BUTTERFLIES AND HUMMINGBIRDS:

Plant perennials with a variety of bloom times starting in early spring continuing into late fall to attract the early migrators and late season visitors.\* Plant larger groups where possible to make the biggest show to attract the attention of passing butterflies and hummingbirds. Provide a source of fresh water nearby.

\*Use the *Advanced Plant Search* tool on our website ([www.sandysplants.com](http://www.sandysplants.com)) to find plants for every season.
