

Butterfly

Remember that butterflies need both nectar and host plants (for their caterpillars to eat), so be prepared for some leaf damage to host plants.

Special Hints for Attracting Butterflies and Hummingbirds:

Plant perennials with a variety of bloom times starting in early spring continuing into late fall to attract the early migrators and late season visitors.* Plant larger groups where possible to make the biggest show to attract the attention of passing butterflies and hummingbirds. Include host plants in your landscape for caterpillars. Provide a source of fresh water nearby.

*Use the *Advanced Plant Search* tool on our website (www.sandysplants.com) to find plants for every season.
