			Sunset Grooves	Hoosier Harmony	
			Touch of Class	Paradigm	
				Paul's Glory	
				Stained Glass	
			Striptease		

*Our table has changed from leaf size to height to better represent plant presence in the garden.

Hosta prefer partial to full shade. In Zone 7 even those that can "take some sun" will only take some morning sun; later sun will burn leaf edges. With some sun they need more moisture. All hosta appreciate consistent moisture for best appearance.

*Plants will typically grow larger in northern regions.
